

PRICE MOVEMENT

Thailand's stock market fluctuated, following global market trends. The SET Index for January closed down more than 6.65% this month when compared to the previous month due to foreign selling for short-run profits and on mounting concern about political tension in Egypt. Depreciation of the Thai baht gave foreign investors opportunities to earn both capital gains and currency yields.

The SET50 Index closed at 668.58 points, down 51.61 points or 7.16% from the previous month.
