

PRICE MOVEMENT

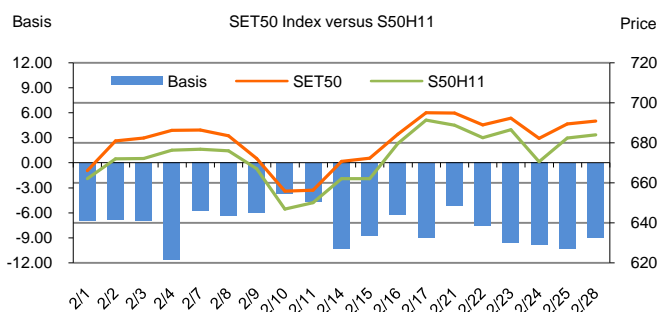

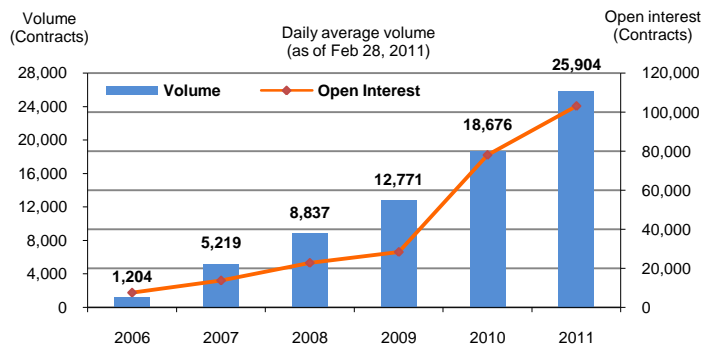

The SET50 Index climbed 22.31 points, or 3.34% from the previous month closing at 690.89 points. The index movement followed global market sentiment in shifting from safe-haven to stock market when president Mubarak of Egypt resigned his post. However, recent unrest in Libya during the last week of February still worried investor driving demand for gold further.

LBMA GOLD A.M. fixing on February 24 was at \$1,414.50, its 11-week high since December 8, 2010 where LBMA GOLD A.M. fixing was at \$1,426.00. TFEX Gold Futures trading also hit its record high twice this month at 13,951 and 14,327 contracts on February 21 and 24 respectively.
