

PRICE MOVEMENT

SET50 Index fell more than 45 points, or 5.91% from the previous month closing at 747.07 points. Thai economic concerns have reduced foreign and local investment confidence in the Thai market.

For precious metals, LBMA Gold AM and Silver fixing for the end of August were at \$1,826 and \$41.35 respectively. Gold fixing made a new record high as demand for safe haven investment rose on resurgent worries about a possible new recession for the global economy.

TFEX daily volume reach an all time high of 122,572 contracts where over 90,000 contracts were from gold futures alone. This month daily average volume shot as high as 74,816 contracts.
